

KALEIDOSCOPE

WASHROOM
CUBICLES

now each door leaf is a
work of art

At GIBCA We have a culture of reinventing and reimagining applications. Recent years saw us launch a completely redesigned, revolutionary range of washroom cubicles that are unique in terms of sophistication, features and design when compared to traditional hardware mounted cut boards in use on most projects.

We have taken the concept of bespoke design a generation forward. We have developed and perfected a revolutionary inlaid pattern face creation technology that allows us to offer a unique design for each project. Kaleidoscope is a next generation cubicle panel that allows the designers to create a unique panel incorporating a mix of colors and patterns on the same face.

KEY FEATURES

- Fresh & bright mix of colors to create a vibrant washroom space.
- Bottom clearance of 30mm providing maximum privacy.
- Privacy lock with red and white indicator with the provision for emergency access.
- Pattern customization option to suit any design idea.
- Various panel thicknesses and hardware options.

PANEL CONSTRUCTION

Door Post and divider are in 33mm thick sandwich panel comprising MR composite flooring grade load bearing core. Finishes are in Solid Compact Grade surfaces with black edges suitable for wet areas.
